

Project Information Management System for New Major Highway Works

Hong Kong

Completion Date:

1998

Client:

Highways Department, HKSAR
Government

Service Provided:

Enhancement of Management
Capability (in joint venture with
Nichols Associates Ltd.)

The assignment required the review and development of a project information management system (PIMS) for the new major works programme of mega-scale highway projects. This included a review of the Client's existing PIMS and those on the market and the development of requirements for a customized system for the Client.
